ANTIAGING BREAKTHROUGH ISSUE

Dr. Steenblock and his team of scientists and doctors have come up with an efficient clinical process that has helped older people look and feel younger without relying on masking or covering up signs of aging. Their method produces youthful effects, in part, by using stem cells to replace old cells in tissues and organs with new, younger ones, and by helping enhance the body's own healing and rejuvenative mechanisms.

Steenblock has been involved in the clinical use of umbilical cord and bone marrow stem cells in patients for over seventeen (17) years. One of the things he noticed is that whenever these adult (nonembryonic) stem cells were combined with other therapeutic measures it produced a more youthful appearance and functioning in elderly patients. Armed with these observations and insights, Dr. Steenblock and his group of researchers and doctors set out to build on this in a formal, systematic way.

Said Dr. Steenblock, "Traditional methods of dealing with aging and its effects basically amount to making minor repairs to a house that is deteriorating and then slapping paint on it. What's needed is to replace the rotting, aging planks and wiring and plumbing with new counterparts. My team and I figured out

how to help pull this off at the biological level in living houses, which is to say, people".

The anti-aging effects of this "inside-out remodel and renew process" have been seen in some people after only a handful of days, such as in the case of ML:

ML Day 1 "Youngering" ML- After 3 days of "Youngering"

These photos were taken with a 7S iPhone by Dr. Steenblock. No touchups, Photoshop or other editing was done, just 3 days of treatments that comprise what Steenblock has dubbed "the Youngering™ method".

One of the reasons cells get old and senescent (inactive) is because telomeres (which are situated at the end of chromosomes and protect them from being damaged) get shorter each time a cell divides which occurs as a result of STRESS and AGING. After about 52 such divisions, the telomeres become so short that the cell can no longer divide which keeps your cells and tissues

from renewing and regenerating themselves.

The Youngering™ method/program includes administration of safe telomere extenders to help make older cells younger. These rejuvenated cells do what younger cells do: strengthen, tone and revitalize tissues and organs.

In addition, clients are given treatments that selectively remove and eliminate senescent cells including inactive stem cells in the bone marrow. This process prods the body to produce new, active replacement stem cells that secrete substances ([growth factors](#)) which stimulate the creation of new cells throughout the body as well as to encourage the healing of aged, injured, diseased or otherwise damaged tissues. Since these growth factors decline with age, boosting their levels to more youthful levels has a revitalizing effect.

Stem cells are also given by intravenous drip to Youngering™ clients. These circulating stem cells home in on signals produced by tissues that are ischemic (lack oxygen) or are injured. As part of the Youngering™ program, specific methods and therapies are used which subtly boost these homing signals.

Each Youngering™ client's body-wide circulation is also enhanced using FDA approved therapies ([ECP](#), [PAT](#)) which help get bone marrow and other stem cells (circulating in the client's body) into aging, diseased or damaged tissues.

On top of this, immune cells as well as stem cells are activated or "turned on".

For those with painful or diseased joints, there is an optional treatment available (for an extra charge): stem cells are injected into these joints. But, as part

of a special offer, laser and ultrasound therapies that help direct stem cells to those areas of client's body that hurt (including joints) will be done at no extra charge. For those clients who desire it, a [growth factor](#) rich cocktail called [Platelet-rich plasma](#) will be created from their own blood which is then injected into problem areas (This does cost extra).

**SPECIAL INTRODUCTORY PRICE – ONE DAY OF
YOUNGERING™ TREATMENTS IN DR.
STEENBLOCK'S CLINIC**

- ▶ **ONE STEM CELL** treatment (usually \$6K USD).
- ▶ **SENOLYTIC therapy** consisting of intravenous and oral therapies to eliminate senescent cells everywhere in the body.

The aforementioned proprietary treatments help replace old poorly functioning or inactive stem cells throughout your body with new, more vigorous stem cells. These new stem cells secrete growth factors and produce replacement cells that should support, heal and repair your body for many more years to come!

- ▶ **LOW OXYGEN PRECONDITIONING** to stimulate growth factor production.
- ▶ Treatment with **GROWTH FACTORS** to **enhance tissue repair throughout your body.**
- ▶ Treatment with **Telomere extenders** to **rejuvenate your body's cells and tissues.**

To achieve good results* Youngering™ clients need to stay at Dr. Steenblock's clinic for one day. Optimum treatments require more than one day but a single day treatment is what most people can do

and should do at least once yearly in order to keep up the replacement of cells as they wear out.

Adds Dr. Steenblock, "We believe this is the very best, most effective, and least expensive stem cell based antiaging approach in existence. And, after over 17 years of safely using stem cells in over 5000 patients my team and I have the experience, knowhow and equipment to help make stem cell Youngering™ therapy work for you!"

THE NORMAL PRICE FOR CLIENTS RECEIVING A STANDARD BONE MARROW OR FAT STEM PROCEDURE IS \$6K. BUT AS PART OF THIS OFFER.....

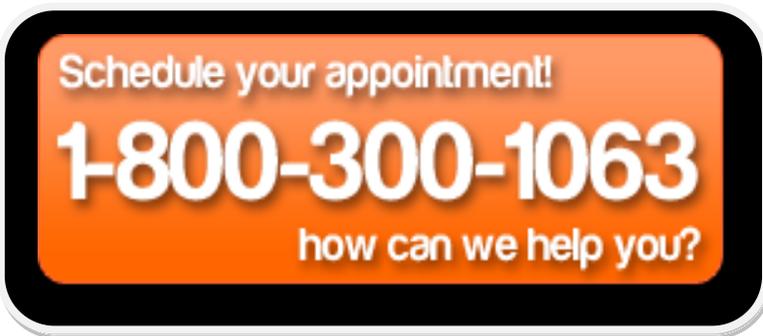

► NEW CLIENTS PAY \$5K (This is \$1000.00 off the normal price)

► EXISTING STEM CELL CLIENTS OF DR. STEENBLOCK PAY \$4K

For more information on Dr. Steenblock's Youngering™ Program or to book your appointment right now call **1-949-229-8551** or call **toll free 1-800-300-1063.**

A shoutout from the rooftop

Dear Dr. Steenblock,

Thank you, thank you, thank you for a most extraordinary experience at your center, with you and your inspired staff.

This ended up being the adventure of a lifetime made possible by you, your epic work, and the remarkable people that work for you.

I knew it was going to be astounding because Audrey filled us in about you and your work; I had no idea it would be so much fun and that we would all be the recipient of your amazing generosity and kindness.

Please know how much I deeply appreciate all that you have done and given. You truly make the world a better place.

With gratitude, love and blessings for your life,

Dr. Mary

If ..

Your physician says there is nothing more that can be done for you

You consume more pills than food each day

Questions remain about your diagnosis

Your doctor knows little or nothing about scientifically validated herbal, dietary or nutritional treatments
